Today's goal

- Go home with your professional website live 😊
- One landing page with 5 section
 - Home / Introduction
 - CV
 - Research interests
 - Skills contact
- Research project page

This is **practice**. Same workflow you will use in your research project.

Building your website

Section 1

Step 1

- Build your repo
 - Log in to **github.com** and click on “New repository”
 - Repo name: **yourusername.github.io**
 - Visibility: Public
 - Click on **Create repository**

Step 2

- Open **GitHub Desktop App**
- Decide where in your HD to **clone** your repo
- Now GitHub and your HD are connected through Git

Step 3

- Open Positron
- Open your cloned repo folder
- Build the quarto website skeleton
 - > Quarto: Create Project
 - Website Project
- What happened?
 - Quarto created a small set of files that together render (create) and define a website
 - A config file, a homepage, an about page, styles.css, etc...

Step 4

- Go to Positron's terminal
- Type: `quarto preview`

Step 5

- Tell Quarto which pages do you have
- Go to `_quarto.yml`

```
website:  
  title: "Your Name"  
  navbar:  
    left:  
      - href: index.qmd  
        text: Home  
      - href: project.qmd  
        text: Project
```

- Create `project.qmd`

Step 6

- Upload your assets
 - `images/headshot.jpg`
 - `files/cv.pdf`

Step 7

- Populate your site!

Step 7

index.qmd

```
---  
title: "Your Name"  
---  
  
{width=200px}  
  
I am a graduate student in Economics at UTEP, studying  
[your focus area].  
  
## CV  
  
[**Download full CV (PDF)**](files/cv.pdf)  
  
**Education**  
  
- M.S. Economics, The University of Texas at El Paso (expected 20XX)  
- B.A. Economics, [Institution] (20XX)
```

Step 7

index.qmd

```
**Experience**
```

```
- [Role], [Organization], [Dates]
```

```
## Research interests
```

```
My research interests center on [topic area], particularly  
[specific question or method].
```

```
## Skills
```

```
- Python (pandas, statsmodels)  
- R / Stata  
- Time series forecasting
```

```
## Contact
```

```
**Email:** your_email@miners.utep.edu
```

```
**LinkedIn:** [linkedin.com/in/yourname](https://linkedin.com/in/yourname) ·
```

```
**GitHub:** [github.com/yourusername](https://github.com/yourusername)
```

Step 7

index.qmd

```
---  
title: "Research Project"  
---
```

Overview

I am developing a time series forecasting project on [working topic], as part of ECON-5371. A full description, methodology, and results will be posted here as the project develops.

Status

Proposal stage – details forthcoming.

Step 8

- Configure GitHub pages
 - In `_quarto.yml`

```
project:  
  type: website  
  output-dir: docs
```

Step 9

- Render the site
 - Go to Positron's terminal: `quarto render`

Step 10

- Publish the site
 - Go to GitHub
 - Go to **Settings > Pages**
 - Under **Source**, select **Deploy from a branch**
 - Branch: **main**
 - Folder: **/docs**
 - Click on **save**

Step 11

- Push and deploy
 - Go to GitHub Desktop App
 - **Commit** and **push** your updates

Step 12

- Visit your site: <https://yourusername.github.io>

Personalize your websote

Section 2

Populate your README.md file

```
# Your Name – Personal Website
```

```
Source code for my personal website, built with Quarto and  
deployed via GitHub Pages.
```

```
**Live site:** https://yourusername.github.io
```

```
## Built with
```

- [Quarto](<https://quarto.org>)
- GitHub Pages

```
## Structure
```

- `index.qmd` – home page (CV, research interests, skills, contact)
- `project.qmd` – research project page
- `files/` – downloadable CV
- `images/` – headshot and other images
- `docs/` – rendered site (published output, do not edit directly)

“Steal” ideas

- Get inspiration from other websites
- If possible, check their GitHub repo’s to see how they build and organize their site.

Personalize

- Color palette
 - Use UTEP's color palette
 - Create your own
- Add a favicon
- Typography
 - Select your own fonts
 - Fonts should be appropriate for screen reading (i.e., sans serif)
 - No more than two type of fontfaces
 - One for headings (can be serif)
 - One for text (should be sans serif)
